Congoleum®

TRIVERSA™

PRIME

TX403

New and improved, Triversa Prime™ is constructed with a solid stone polymer composite (SPC) core that provides, strength, durability and superior indentation resistance. Completely waterproof and able to withstand wide temperature changes, it is the perfect solution for any area in the home. A sound dampening backer makes Triversa Prime quiet underfoot. These beautiful designs feature large scale formats, and much more. And all of these outstanding designs are now available at one very competitive price.
